

ABSTRACT OF THE DISCLOSURE

In order to facilitate the display and evaluation of data acquired while irradiating
5 a body, e.g. a patient undergoing radiation therapy, using a dosimetry system which
has a plurality of sensors for disposition on, in or near the body to be irradiated and a
dosimetry report comprises representations, for example drawings or photographs, of
the body irradiated, along with the positions and the dose data for those specific sites
where the dosimeter sensors were placed. Preferably the representation comprises
10 actual photographs of the patient with the sensors attached taken during, before or
after irradiation within the sensors attached.
